

/ EOSC Synergy

Extending EOSC coordination at the National level

Expanding Adoption

Developing new capabilities by opening national thematic services to European access, based on a strong human network and advanced training tools.

Federating

Harmonizing policies and federating relevant national research e-Infrastructures, scientific data and thematic services, bridging the gap between national initiatives and EOSC.

Delivering Services

Pushing the state-of-the-art in software and services life-cycle through a quality-driven approach to services integration.

Building Capacity

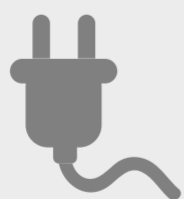

Enlarging EOSC with a critical mass of computing and storage resources in such a way that resources can be seamlessly exploited via federation services.

Developing Capability

Promoting EOSC adoption by the research communities by expanding and building knowledge on common interfaces, standards and best practices.

Software Quality as a Service: SQaaS

Increasing EOSC adoption and facilitating the on-boarding of providers.
